Team ID	Not Assigned
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I don't know which crop will grow well in my land. • Weather conditions are changing every year. • I need a reliable way to choose crops.	THINKS • If I choose the wrong crop, I will face loss. • There must be a smarter way to decide crops. • Technology could help me improve yield.
PERSONA NAME (Small-scale Farmer)	
DOES • Asks neighbors or local farmers for advice • Selects crops based on past experience • Uses trial and error methods in farming	FEELS Confused due to lack of proper guidance Worried about crop failure and financial loss Hopeful for better solutions using technology
